

THE SMARTEST WAY TO INTERFACE

With the HMIQ you can drag, drop and configure a user interface on the Cloud.

No programming is needed!

- ▶ Create your own HMI with custom GUI keypads, custom key outputs and custom labeled keys on our rugged Android device.
- ▶ Dynamic Layout allows users to switch between screens using configured buttons, menus or host commands.
- ▶ Fully leverage the user interface development tools to reduce development time and cost.
- ▶ Easily move existing or legacy applications onto the HMIQ.

THE HARDWARE

- ▶ Top tier 7-inch tablet with full-color, touchscreen display.
- ▶ Optional E-Stop to meet safety requirements.
- ▶ Comfortable and fatigue-free handling by right and left handed persons.
- ▶ Android 7.0 can provide additional capabilities such as email, messaging and third party apps.
- ▶ Front mounted, keypad with a joystick and 4 hardened buttons available.
- ▶ Serial port for RS-232/RS-422/RS-485 communication
- ▶ Front and rear facing cameras.
- ▶ Bluetooth and Wi-Fi ready.

THE APPLICATION

- ▶ Design custom user interfaces on the HMIQ "drag & drop" WYSIWYG platform.
- ▶ Infinite combinations of colors, text, displays and keypads available.
- ▶ White label the GUI with your company's logo or product branding within the display.
- ▶ Add your own images and custom graphic buttons.
- ▶ Deploy the custom interface on multiple HMIQ hardware devices.
- ▶ Store & Update the custom Interface in seconds over the cloud for added security.
- ▶ Secure multi-level password protection.
- ▶ Send unlimited ASCII strings on key press and a second unlimited ASCII string on key release.
